

Shower/In-line Fan Range

SF100/120/150 ID100/120/150

- Designed for the safe ventilation of bathrooms, toilets and shower rooms, the SF/ID 100 (100mm 4") range of in-line extractor fans remove any risk of an electric shock in wet areas as the fan is mounted remotely.
- The SF/ID120 (120mm 5") series of in-line fans have been engineered for the ventilation of larger shower or bathroom areas, and are 56% more powerful than their 100mm counterparts.
- Powerful, yet extremely quiet in operation, the extract rate of the SF/ID100 is 85m³/hr 23 litres per second, whilst the SF/ID120 performs with an impressive 130m³/hr 36 litres per second. Also new to the range is the ID150 Tube Fan, with a top performance of 230m³/hr, 64 litres per second.
- Available with or without a timer, the SF100/120/150 fan kits are supplied complete with a fan unit, one length of PVC flexible ducting, one internal (white) and one external wall grille, fixing screws, plugs and straps to secure the duct to the grilles.
- The ID100/120/150 series comprises a fan unit only and is suitable for boosting another fan where a long run of ducting is used.
- The units are all manufactured using high impact ABS thermoplastics for strength and durability, aesthetics and easy cleaning.
- Power is provided by a single phase induction motor with pre-oiled bearings for a long, maintenance-free life.
- Designed to comply with the 2006 Building Regulations on Ventilation (F1).

Technical Details

Cat. No.	Product type
SF	In-line fan kits with PVC duct and wall grilles
SF100/120/150S	Standard model for remote switching
SF100/120/150T	Timer model incorporating integral adjustable electronic timer (1-20 mins)
ID In-line fans	
ID100/120/150	Standard model (tube fan) for remote switching
ID100/120/150S	Standard model for remote switching with bracket
ID100/120/150T	Timer model incorporating integral adjustable electronic timer (1-20 mins)

Performance

SF/ID100 Up to 85m³/hr, 23 litres per second

SF/ID120 Up to 130m³/hr, 36 litres per second

SF/ID150 Up to 230m³/hr, 64 litres per second

Performance may vary depending on the length of ducting used

Installation

The shower fan is easy to install in the average loft/ceiling recess as after the hole has been cut in the ceiling of the shower/room, all other work is continued outside the living area.

Electrical

220-240V - AC. 50Hz Single phase consuming 14W on ID100, 15.5W on ID120 and 20W on ID150. These fans are double insulated and do not require an earth. All wiring must comply with current IEE regulations. A double pole isolating switch, having a contact separation of at least 3mm in all poles, must be used with a 3 amp fuse fitted.
